

## **MISSION STATEMENT:**

To encourage and assist the community with the ethical production or use of energy which has the least environmental impact.

## **INTRODUCTION:**

Our Mission statement is grounded in a set of principles that govern all CE4G's projects. These principles provide a hierarchy of priorities that govern our decision making processes. They reflect our basic areas of concern:

- Anthropogenic generated:
  - climate change
  - ecosystem destruction and degradation
- Government and global inaction

## **PRINCIPLES** (in order of priority) - the four "Es":

1. Ethics
  - To make decisions that cause the least harm.
  - To make decisions that create the greatest benefit.
2. Energy
  - To focus on the provision and uptake of environmentally sustainable energy, and energy efficiency
3. Equity
  - To equitably share the benefits of our projects with the whole community
4. Education
  - To raise awareness about energy production and use
  - To share our knowledge and experience to enable others to follow in our footsteps

## **SOME IMPLICATIONS**

- To partner with like-minded individuals and organisations
- To encourage investment in renewable energy
- To facilitate other renewably energy projects in the Goulburn Mulwaree Shire.
- To reduce our community's carbon footprint and carbon emissions.
- To continue to be a community run and driven organisation.
- To facilitate the uptake of renewable energy sources by local households, organisations and businesses.
- To help reduce the power costs of the most vulnerable in our community with the aim of making energy more affordable
- To create a community fund to facilitate the equitable sharing of the benefits of all projects
- To promote the development of renewable energy projects.
- To encourage people to support our projects
- To transition out of fossil fuels
